Putnam Building Permit Process

Permits are required for any construction, alteration, movement, enlargement, replacement, repair, equipment, use and occupancy, location, removal and demolition of detached one and two-family dwellings and multiple single-family dwellings (Townhouses, Condos), as well as commercial and industrial demolition. Also any commercial construction or commercial renovations etc. require permits.

The purpose for Building Permits is twofold. First, they are required by the State Building Code. But, more importantly, they provide the minimum requirements to safeguard the public safety, health and general welfare through establishment of standards for affordability, structural strength, means of egress, stability, sanitation, light and ventilation, energy conservation and safety to life and property from fire and other hazards.
